---

## SUMMARY

Motivated Computer Science undergraduate student with a foundation in web development. Skilled in frontend and backend technologies, with experience from work and personal projects. Looking for an internship position to apply and expand skills.

---

## WORK EXPERIENCE

### Frontend Developer / Web Designer

www.e GmbH

June 2020 - August 2023, Berlin, Germany

- Designed and prototyped responsive website layouts for clients using Figma and Adobe XD.
- Developed and maintained custom websites using HTML, CSS, JavaScript, and PHP.
- Implemented and customized online shops with WordPress, WooCommerce, and other CMS platforms.
- Maintained 50+ client websites, improving page speed and user satisfaction.

---

## PROJECTS

### OnceVerse (Spring Boot, PostgreSQL, Next.js)

Personal • [github.com/vuducle/org.student.htw](https://github.com/vuducle/org.student.htw)

- Built a fan-based social platform with secure login, user-generated posts, and interactive frontend views using Next.js and TailwindCSS.
- Developed and exposed RESTful APIs using Spring Boot, including authentication, post management, and comment features.
- Designed a PostgreSQL database schema to support scalable data models and relational consistency across users and posts.

### World of Adventures (Django, TailwindCSS, SQLite)

Academic • [github.com/info2-giga/woa](https://github.com/info2-giga/woa)

- Developed a fullstack web application in a student team, implementing user authentication, quest tracking, and dynamic content rendering using Django.
- Designed responsive UI components with TailwindCSS, focusing on mobile-first accessibility and clean layouts.
- Integrated SQLite for data storage, managing models and migrations with Django ORM and admin interface.

---

## EDUCATION
